

LOEWE is committed to creating sharply designed and precisely executed luxury products, always with a responsible approach to the environment, abiding by moral and ethical values in the management of the company and entire supply chain.

We integrate Quality and Sustainability into our business model, with excellence, innovation, passion and integrity instilled throughout the lifecycle of our products, from design until the end of life. Starting with the sourcing of raw materials through to supplier relationships, production, warehouse management, shipping, retail and product use, our values run throughout.

Our strategy is to incorporate sustainability as a source of new opportunities that add more value to our products, all the while becoming more efficient at using resources. That means developing a corporate culture of sustainability that benefits the company in the long term and continuously improves our performance overall.

To achieve that goal, LOEWE ensures the following commitments:

- Comply with applicable legal requirements.
- Continuous improvement of the environmental performance of all our products.
- Prevent pollution, protect biodiversity, reduce waste, and minimize the consumption of resources.
- Ensure the implementation of the highest environmental and social standards throughout the supply chains and use of sustainable materials.
- Reduce the CO2 emissions relating to our energy consumption.
- Engage and train all employees, suppliers and subcontractors on our sustainability commitments.
- Develop our operations under an ethical, responsible and fair trade perspective.

This is our framework to establish and review objectives and targets aligned to our ongoing commitment to protecting natural resources and human rights.
